swaraj.padma358@gmail.com

As Executive Director at JLL Technologies, I have built my reputation on solving complex business challenges through innovative technology solutions. Leading a \$13M portfolio and multi-geography engineering teams, I consistently deliver measurable impact—from **\$10M annualized benefits** through our LEAP platform to **CIO 100 Award-winning** automation solutions.

My leadership approach combines strategic vision with execution excellence. I have successfully scaled high-performing organizations across Healthcare, Financial Services, and Real Estate sectors, emphasizing innovation, mentorship, and operational efficiency. Notable achievements include pioneering GenAI implementations that achieved 100% audit coverage improvements and **\$2M-\$3M in annualized benefits**.

Strategic Impact & Innovation

What sets me apart is my ability to bridge technical expertise with business strategy. I drive enterprise-wide digital transformation by:

- **Architecting solutions** that align technology initiatives with C-suite priorities
- **Building scalable platforms** that process 100K+ transactions while reducing operational costs by millions
- **Leading cross-functional teams** across multiple geographies with focus on diversity and psychological safety
- **Delivering quick wins** while establishing foundations for long-term organizational growth

My 19+ years of progressive experience, from programmer analyst to executive director, provides me with the unique perspective to understand both technical complexities and business imperatives—enabling me to drive innovation while maintaining unwavering focus on business value.

- Cross-functional Collaboration
- Stakeholder Management
- Business Transformation
- Financial Planning & Management
- Engineering Team Building & Scaling
- Technology Strategy
- Enterprise Product Development
- Innovation Leadership
- Technology Portfolio Management
- AI/ML Solution Architecture

Work Experience

Executive Director – Engineering & Innovation

JLL Technologies, India

June 2019 - Current

- As a technology executive for JBS, JLL's global backend operations, I am responsible for conceptualizing and delivering enterprise-scale solutions that drive business transformation globally. I direct a \$13M product portfolio and engineering teams focused on solving complex business challenges through innovative technology while building and scaling high-performing engineering organizations across multiple geographies
- **Strategic Technology Leadership**
 - Drive enterprise-wide technology strategy, influencing C-suite stakeholders to secure strategic buy-in and resource allocation
 - Champion digital transformation initiatives leveraging GenAI and emerging technologies to enhance organizational productivity
 - Established Automation Services team as strategic innovation hub, scaling AI solutions across JBS globally
- **Business Problem Solving & Architecture**
 - Architect innovative solutions to complex operational challenges leveraging cutting-edge technologies
 - Systematically redesign critical processes to optimize resource utilization and mitigate operational risks
 - Implement GenAI solutions delivering measurable productivity gains across multiple business functions
- **Organizational Excellence & Team Leadership**
 - Built and scaled high-performing engineering organization across multiple business lines and geographies
 - Champion culture of innovation, mentorship, and psychological safety with emphasis on diversity and inclusion
 - Drive technology standardization and platform modernization enabling rapid development at enterprise scale
- **Technology Standardization & Platform Excellence**
 - Led enterprise platform evaluations and selections, delivering \$1.5M+ in licensing cost savings
 - Established standardized evaluation frameworks balancing technical requirements, user experience, and ROI

- **Strategic Collaboration**

- Partner with executive leadership to align technology roadmaps with corporate strategic objective
- Collaborate with enterprise architecture teams to implement solutions supporting long-term business goal
- Foster cross-functional partnerships driving innovation and operational excellence across the organization

Key Strategic Initiatives & Business Impact

- Source to Pay:
 - Led development of automated invoice processing and payment systems
 - Achieved substantial cost reduction and accelerated processing times
 - **Recognized with prestigious CIO 100 award for innovation**
- T&E Reimagined: **AI-Powered** Expense Management Platform
 - Spearheaded the conceptualization and development of GenAI and Vision Model-based solution transforming manual expense processing
 - Directed architecture teams creating innovative platform **combining AWS, JLL GPT, and PeopleSoft**
 - Targeted to achieve 100% audit coverage (up from 57%) while significantly improving employee reimbursement experience
 - Established enterprise-grade security, compliance, and monitoring capabilities
 - Estimated \$2M to \$3M annualized benefits
- LEAP (Lease Enterprise Administration Platform)
 - Led product innovation team in creating enterprise lease data platform delivering \$10M annualized benefits
 - Guided architecture team developing scalable solution processing 100K leases per year
 - Orchestrated migration strategy for 650+ clients while establishing enterprise lease data repository
 - Championed development of **JLL's first AI-powered lease abstraction capability**, creating proprietary data assets

- Automating Manual Processes
 - Strategically identified and automated multiple manual processes across JBS operations delivering significant FTE-equivalent benefits
 - Realized substantial annual savings through improved operational efficiency and resource reallocation
 - Transformed critical workflows including intake request management for optimal resource utilization

Delivery Manager

Capgemini, India

January 2015 - June 2019

- Key Client Engagements
- Delivery Manager for a team of 70+ offshore Resources
 - Responsible for delivery of projects involving Core Cards system for Global RBWM & CMB Cards and Digital business
- Technology Transformation Architect
